KOLB STUDIOEQUIPMENT

# ClayHeater

## Description

Mounted on a portable and flexible tripod the Kolb ClayHeater uses infrared-heating-elements. A digital temperature control makes sure that the desired temperature on the clay surface will be achieved. Due to infrared technology the clay will be heated as deep as 20 mm without overheating the material.

## Product highlights

- The new generation of equipment can be adjusted to suit each and every shape of design due to the fully mobile heating elements.
- The heat output settings can be set so as to allow sensitive materials such as clay to be heated.
- The acoustic measuring of distances for the optimum drying distance is just as much a standard fitting as the heat sensor for temperature control.

## Technical specifications

	Art.Nr. 1250006 StudioLine Clayheater 4000S Spectratek mobile	Art. Nr. 12500005 StudioLine Clayheater 8000S Spectratek mobile
<b>Vertical height</b>	155 cm	400 cm
<b>Horizontal height</b>	190 cm	360 cm
<b>Temperature control</b>	yes	yes
<b>Voltage</b>	380 V	380 V
<b>Phase</b>	1	3
<b>Power</b>	4,000 W	8,000 W
<b>Digital</b>	yes	yes
<b>Distance sensor</b>	yes	yes
<b>Thermal Integrated Sensor System</b>	yes	yes
<b>2 swivelling &amp; 2 fixed heating elements</b>	-	yes
<b>Working surface</b>	1 m <sup>2</sup>	2 m <sup>2</sup>
<b>Dimensions</b>	2,100 mm x 890 mm x 1,450 mm	2,100 mm x 1,740 mm x 1,450 mm
